CRUISING THE
GREAT BARRIER REEF

JANUARY 16 TO 29, 2011

RICE ALUMNI

Dear Alumni and Friends:

From the soaring peaks of New Zealand's Southern Alps and Sydney's glittering skyline to the underwater jewels of the Great Barrier Reef and the primeval tones of the didgeridoo, the unrivaled riches of "Down Under" are like no other on earth.

Join us on this spectacular journey that captures the essence of the stark contrasts, magnificent landscapes and dynamic cultures of both Australia and New Zealand. The highlight of this experience is the exclusive three-night cruise along the Great Barrier Reef, one of nature's greatest wonders, aboard the intimate CORAL PRINCESS II. Known for the warm Aussie hospitality of its crew and carefree ambiance, this stylish vessel moors at secluded reefs and islands, where you can observe the drama of the underwater world from the comfort of a glass-bottom boat or while snorkeling. The CORAL PRINCESS II's onboard marine biologist will share his passion for, and knowledge of, this unique natural treasure.

Before exploring the reef, immerse yourself in the remote beauty of New Zealand. Marvel at the spectacular mountainous fjords of Milford Sound during a nature cruise and delight in the stunning vistas of Queenstown, Lake Wakatipu and the Remarkable Mountains from Bob's Peak. In Australia, stay in bustling, sophisticated Sydney, a city renowned for its magnificent harbor setting, white sandy beaches and brilliant architecture, and visit Sydney's famous Opera House.

Gain personal insight into local cultures during a dinner with a Christchurch family in their home and learn about the Aborigines' rich heritage at the Tjapukai Aboriginal Cultural Park. An exclusive Auckland Pre-Program Option and/or an Ayers Rock Post-Program Option are also offered.

This journey of a lifetime offers a unique, comprehensive itinerary in the world "Down Under" and a fantastic opportunity to travel with friends and fellow alumni. Space is limited, so I urge you to make your reservation soon, before July 12, 2010, while Early Booking Savings are still available!

Sincerely,

Rose Sundin

THE WONDERS OF THE GREAT BARRIER REEF

The azure tropical waters of the Coral Sea surrounding the legendary Great Barrier Reef is a natural wonder like no other, comprising more than 3,000 individual reefs and 900 islands that span more than 1,400 miles in length.

A virtual pageant of marine life, it encompasses tens of thousands of species of fish, coral, reptiles, plants and mammals, ranging from playful dolphins, multi-colored clownfish and giant green turtles to fluorescent coral, pink-striped rainbow fish and the lumbering dugongs affectionately known as sea cows. In the waters surrounding a single reef, as many as 250 species of shrimp can survive and thrive.

Revered for millennia by local Aborigines who depended on it for their livelihood, later "discovered" by the great explorer Captain James Cook in 1770, the Great Barrier Reef has been designated a UNESCO World Heritage site and enjoys strict environmental protections as an Australian National Marine Park.

This program is a once-in-a-lifetime opportunity to experience this breathtaking tropical sea exhibition in a manner no visit to an aquarium can replicate. While snorkeling or cruising in the glass-bottom boat, you will peer into this magical universe under the waves, where schools of tropical fish swim by in clouds of color, and intricate mosaics reflect a diversity of life rivaled only by the great rainforests of South America. By virtue of its smaller size and special design, the CORAL PRINCESS II can moor off remote reefs, ensuring that the waters will not be overpopulated by other visitors and the ecosystem remains intact as nature intended. Throughout the cruise, the expedition cruiser's personable marine biologist will give interactive presentations and special lectures and will accompany you on all glass-bottom boat excursions and nature walks.
